

Transferability of Classes

Forest Charter School is WASC accredited, which offers a variety of benefits. In addition to being a requirement for Cal Grants, this certification validates the integrity of a school's program, assures that a manageable system of change and self evaluation is ongoing, and heightens the likelihood that a school's credits will be accepted by other public and private schools.

Forest Charter School offers a full menu of courses that meet the A to G admission requirements for the University of California and the California State University. To view the list of FCS courses that are A to G approved visit the UC Doorways site at <http://www.ucop.edu/doorways/>.

All coursework completed and credits earned at FCS offer full transferability to other public high schools and may be considered to meet college entrance requirements. Final decisions regarding which FCS credits/courses to accept are up to the school to which the student transfers.
